

CLINICAL NURSE CONSULTANT CARDIAC SURGERY (Full Time)

Are you ready to join a successful theatre team within a Hospital that is renowned for its excellence in all areas of Health Care?

An exciting and challenging opportunity has become available for a Clinical Nurse Consultant Cardiac within the operating theatres.

The role involves the coordination of the cardiac and endovascular surgical speciality within the operating theatre and facilitating the mission of the hospital. The responsibility include maintaining quality and cost effective equipment and supplies, team education and leadership in consultation with the NUM, while acting as a core staff member and clinical resource person for the Operating Theatres Cardiac speciality.

Essential

- Current registration with AHPRA
- Post graduate perioperative qualifications
- Minimum of 5 years post graduate experience in perioperative nursing with cardiac surgery a speciality
- Membership of relevant professional body
- Proven ability to work both independently and as part of a multi-disciplinary team
- Demonstrated excellent collaborative, leadership, teaching, communication and interpersonal skills
- Flexible work practices to meet changing needs with the ability to prioritise workload in line with competing demands
- Demonstrated organisation and supply of requested loan and approved consumable equipment to facilitate outcomes

Desirable

- Management or Leadership qualification
- Experience in Hybrid Theatres
