

IS Solutions Architect (Full time) - Information Services

Location: Sydney Adventist Hospital

The Sydney Adventist Hospital, known locally as The San, is a large (500+ bed) acute care private and teaching hospital located at Wahroonga. It is recognised for the provision of excellent care across a broad range of health services.

The San is one of only a small number of hospitals who is approaching the full digitisation of its operational ecosystem. Its Information Services department is a leader in the sector with many successes to date including a full complement of core applications, electronic medical record systems (EMR), and integration across information, biomedical and facilities management technologies – all realising efficiencies and improvements to the organisation.

The IS Solutions Architect/Senior Systems Engineer is pivotal to formulating the technical strategy for the organisation, recommending solutions for ICT Infrastructure and the successful adoption of new or modified technologies. Continuous change is the norm on the Hospital's digitisation journey. We are always modifying or implementing new technologies and systems to achieve full automation and digitisation. For this role it includes overseeing initiatives underway now and in the near future:

- Expanding Unified End-point Management with the migration from Horizon View and AirWatch to Workspace ONE,
- Identifying further opportunities in hybrid (private and public) cloud services
- Driving biomedical integration: integrating additional sources of real time patient monitoring with the EMR
- Growing unified communications to include clinical messaging.
- Contributing to native mobile app development that underpins “mass personalisation” of services to staff, patients and their carers.
- Driving platform upgrades to maintain the low-legacy environment.

Essential

- 7 years or more experience in an IT technical area covering support.
- 5 years or more experience in a systems and/or network engineering role.
- Demonstrated experience in Solution / Technical Architecture within medium to large sized enterprise environments.
- Good systems integration experience, with an in-depth understanding of the issues surrounding large systems integration projects.
- Ability to articulate technical solutions in the context of customer requirements.
- Exceptional interpersonal and customer relationship skills.
- Excellent project planning, reporting and documentation skills.

Desirable

- IT related degree and/or relevant industry certification.
- Health related ICT experience

Culturally, we are a values based healthcare facility where the Mission of the Hospital underpins how people interact with each other. Teamwork and collaboration is engendered across clinical,

administrative and service areas and enables great outcomes as staff have a common vision of Caring for the body, mind and spirit of our patients, colleagues, community and ourselves.

Enquiries regarding this role can be addressed via email to Barbara MacKenzie IS Operations & Infrastructure Group Manager: barbara.mackenzie@sah.org.au or phone 02 9480 9876.

Please forward your application, including a cover letter addressing the selection criteria, current curriculum vitae and completed application form (which can be found on the website www.sah.org.au/job-vacancies) to: barbara.mackenzie@sah.org.au

Applications close: 24 July 2017.
